

## ELEMENT RETAINER BARS

There is one retainer bar per element and at least 3 U pins, **picture 1**  
Squeeze the pin to form a “U”, like the one on the left, **picture 2**

1

2

Place the bar against the element plate and the brick, **picture 3**  
Insert the first pin about 1 1/2” from the top of the bar, **picture 4**

3

4

Push the pin into the brick as close to bar as you can so that the pin is flush with the bar, **picture 5**  
Insert another pin 1 1/2” from the bottom of the bar and one in the middle, **picture 6**.  
These bars will help keep the coils from creeping out of the element plate
